NEW

294 K Bytes Out of your Apple! A Solid State Disc Emulator

- ☐ Increase Speed Up To 1000%
- ☐ Software Compatible DOS 3.3, Pascal, CP/M
- ☐ Single or Dual Disk Versions

G.P.L.E.

Highly sophisticated program editor combines the powerful global search, edit, and replace capabilities of PGE with the already popular editing and definable MACRO functions of PLE. GPLE is compatible with various 80-column video boards, contains an 1152-byte MACRO Escape Definition Table, 32-character typehead buffer, nestable macros, automatic loading into a RAM card with option of moving DOS as well, improved lower case input.

PRODUCTS

(Effective August 15, 1982)

This price list supersedes all others and does not include special offers, shipping and handling outside the United States, or Washington State sales tax. Prices are subject to change without notice. Members outside the United States add shipping and handling charges to all orders. Washington State residents add 6.5% state sales tax to all orders.

All program diskettes require at least 48K and one disk drive; unless otherwise specified, we will ship diskettes in DOS 3.3 (16-sector) format.

AP.FILE

\$18.50

Serial Line Editor provides the ability to create and edit EXEC (sequential) text files. Utilities include ability to read/display disk and RAM memory in various formats, transfer binary and text files with one drive, disk sector and memory reads, and much more. In addition, AP.FILE documentation details how program can be modified and expanded to suit your line editing applications.

AP.MAIL Version 3.0

\$30.00

Mailing list and label printing system designed with ease-of-use in mind. Features fast data entry/editing/retrieval, sort on any one of 10 data fields, storage of up to 800 names per disk, support of 1- to 4-abreast labels, and much more! Comes with complete documentation and is compatible with previous versions of AP.MAIL (Available Fall Quarter '82)

AP.TEST

\$18.50

Low-cost diagnostics program designed to thoroughly test your Apple's innards! AP.TEST features test of RAM and ROM memory, disk controller, disk drive speed and head alignment, modem, keyboard, and game I/O.

A.P.P.L.E. PRODUCTS (Continued)

APPLESOFT CARPENTER

\$18.50

Collection of extremely useful and fast machine language utilities — all designed to assist you in the 'construction and management' of your Applesoft programs. Utilities include an Integer Basic to Applesoft Basic CONVERTER that corrects all commands and syntax, a CRUNCHER that optimizes your program for more compact storage, and COMPARE that prints the differences between two Applesoft programs, a formatting LISTER, and two more programs. This collection diskette is a perfect companion to "All About Applesoft" described in the A.P.P.L.E. LIBRARY section.

BIG MAC Macro Editor/Assembler

\$22.50

Powerful, co-resident editor/assembler that is upwards compatible with Ted II+ source files as well as files generated from other assemblers. Easy-to-use program features MACRO-capability, fast conditional assembly, full-feature built-in editor, Sweet-16, all logical and math operations, three separate symbol table generators (alpha, numeric, & cross-referenced), and more! Comes complete with a disk full of utilities and their source files, and extensive well-written manual.

BIG MAC.LC

\$28.50

Same utilities and features as BIG MAC above, but with added features that place it in a class by itself! Loads itself into a language or RAM card for better memory management, provides for nested macros, linking of object code files, built-in binary-text-binary file conversion, symbol table cross referencing, and support of 80 column cards to name a few. For member convenience, a copy of the standard BIG MAC is included on this disk. However, BIG MAC.LC requires a Language or RAM card to operate.

GLOBAL PROGRAM LINE EDITOR

\$38.50

Highly sophisticated program editor combines the powerful global search, edit, and replace capabilities of PGE (see below) with the already popular editing and definable MACRO functions of PLE. GPLE is compatible with various 80-column video boards, contains an 1152-byte MACRO Escape Definition Table, 32-character typehead buffer, nestable macros, automatic loading into a RAM card with option of moving DOS as well, improved lowercase input, and many more. GPLE will prove to be your most indispensable tool! (Sorry, PLE updates are not available)

HIGHER FONTS I

\$13.50

Collection of over 25 fonts or character sets for use with Higher Text Plus. Fonts include many different language alphabets, special math and scientific characters, building and landscape fonts, and many more new and interesting character sets. Display programs included. (Requires a version of Higher Text, not included, to operate.)

HIGHER TEXT PLUS

\$27.50

Generate upper and lower case text on the Apple Hires screen in a variety of typefaces, sizes, and colors. Features an easy-to-use editor for generation of your own unique character sets (fonts), several utilities to enhance your creation of Hires displays, sample fonts, and easy-to-read documentation [assumes full working knowledge of either Integer and/or Applesoft Basic].

PROGRAM GLOBAL EDITOR

\$18.50

Utility for Applesoft programs that features global search, edit and replace, automatic line number and renumber capability, optimized listing of program to printer/screen, formatted hexadecimal dumps, and compatibility with Program Line Editor ver 2.0. Makes a great program development tool!

PROGRAM LINE EDITOR (ver 2.0)

\$20.00

Very popular utility package that features user-definable keyboard macros, programmable cursor, powerful line editor, upper and lower case input without special driver routines (with AP.LCASE or other lowercase adapter), handy 'stop list', and the entire program is transparent to the user until called upon! Highly recommended for those perfectionists who hate to edit/retype lines using POKE 33,33.

SOFT SEVENTY

\$22.00

Fine utility program package for generating 70 column display without the necessity of an 80 column video board. Machine language program features full 90-character ASCII upper/lower case and 96-character graphic character sets (both redefinable by user), toggle of fonts, text and window inversion, overstrike, toggle of 40/70 column screen, compatibility with modems, and more! Compatible with Applesoft, Integer, and Machine language programs that use the normal Apple I/O blocks. Not suitable for most word processing applications. (Requires a black/white TV or monitor for best readability.)

SYMBOL SYMON

\$20.00

Easy to use development and debugging tool that is designed to assist the assembly language programmer. Symbol Symon makes it easy to understand and debug your machine language programs with features such as step and trace from label to label (with symbol table from the BIG MAC Series Editor/Assembler or others), address to address, etc. Insert up to 8 BRKpoints, display memory in both hex and ASCII, set up and use your own zero page of memory, COUT simulator, and more! Program disk comes with easy to read, complete documentation. A fine addition to our BIG MAC or BIG MAC.LC Editor/Assembler and your machine language program development library!

WORD WEAVER ///

\$75.00

Very sophisticated, comprehensive, and easy-to-use line oriented word processor package for the Apple ///. Features imbeddable printer control codes, text formatting with on/off toggle, global search, edit and replace, linking of up to 50 separate files, easy and logical editing commands, and much, much more. A must for the serious Apple /// computer enthusiast. (Apple ///, 128K, and printer are required)

HARDWARE

First we brought you the APLCASE lowercase adapters, then we added the APDRIVE and APCONTROLLER, now look what we've got for you and your Apple!

Due to the fluctuations of hardware manufacturers' prices, it is necessary to adjust the price of our products to reflect these changes. In the case of the APDRIVES and APCONTROLLERS, the savings have been passed on to you, our members, in a much lower price! This is the time to buy and save!! (Note: All hardware product orders, except the APLCASE lowercase adapters, must include a United States shipping address. Sorry, these hardware products can not be shipped outside the U.S.)

AP.DRIVE

\$345.00

First 100% plus-compatible 35-track disk drive for the Apple II & II+ microcomputers. The AP.DRIVE plugs into your existing Apple disk controller card or the AP.CONTROLLER (below), thus affording you cost effective floppy storage and greater system flexibility! AP.DRIVE is a Shugart SA400 drive and carries a 120 day warranty against defects in workmanship from Micro-Sci of Santa Ana, California. Comes complete with spiral bound installation manual and test disk.

AP.DRIVE w/CONTROLLER

\$425.00

Same as the AP.DRIVE above, but with an Apple compatible disk controller card as well. Easily select between DOS 3.3 and DOS 3.2 via an on-board hardware jumper. Includes 'The Filer' — a DOS 3.3 utility diskette.

AP.MANUAL

\$30.00

Technical data, schematics, diagnostics disk and trouble shooting data for the above AP.DRIVE and AP.CONTROLLER. A definite must, if you have one or more of our drives. (Sorry, AP.MANUAL sold only to purchasers of the AP.DRIVE above)

AP.COOLKIT

\$22.50

Air conditioning for your Apple computer to keep it cool and calm during those heated times that you are not! Kit contains quiet, reliable, industrial grade 3-inch Torin TA300S fan, line cord, mounting tape, and easy installation instructions. (See article in May '82 issue of Call —A.P.P.L.E.)

AP.LCASE 1

\$30.00

Lower case adapter for Rev 6 and earlier Apples (rev 0-6 have memory select blocks). Chip is compatible with both Integer and Applesoft Basics, Pascal, CP/M, and most word-processing software. Documentation includes complete and easy-to-follow installation instructions designed to get you up and using lowercase in very little time.

AP.LCASE 2

\$25.00

Same features as our original AP.LCASE 1 above, but specifically for those later Apple computers (Rev 7 on up). Includes easy installation instructions, patches, and programs.

DICE

\$12.50

(w/AP.LCASE 2)

\$10.00

(w/AP.LCASE 1)

\$7.50

Special routines designed specifically for use with lowercase adapters. DICE makes it easy to input and output UPPER and lower case characters and special symbols directly from the keyboard. Utility also features scrolling speed control, stop list, non-flashing cursor, handy ctrl-character functions, instructions for making the shift-key modification to your Apple, and more!

VERSACARD by Prometheus

\$135.00

Four of the most popular Apple peripheral functions on one card! Provides (1) 6850 ACIA Serial Interface with RS-232C cable; (2) eight-bit Parallel port/ (3) Real-time Clock/ Calendar with one-second resolution, interrupts, 4-time formats, and two-year battery backup; (4) BSR/X-10 ultrasonic control interface. VERSACARD is fully compatible with Pascal and CP/M and no special disks/modifications are required! Securely packaged with easy-to-use documentation.

BSR TRANSDUCER

\$17.50

Ultrasonic transducer for use with the VERSACARD above and your BSR/X-10 Controller (not included).

GRAPHITTI by Prometheus

\$85.00

Parallel interface for your Epson printer (with Graphtrax) features easy transfer of Apple graphics screens in a variety of styles to your MX series printer without loading special programs. Moreover, the GRAPHITTI interface allows the setting of linefeeds, video, high-bit, margins, page and line length; allows the sending of printer ESCape codes as control characters, and adds a text screen dump — all on-board! Fully compatible with Apple languages and comes packaged with complete instructions and parallel cable for Epson printer.

SOLID STATE DISK by Syntex

Single board, solid state RAM memory enhancing your Basic, Pascal, and CP/ database management, and other important reliability and speed! Includes single tape copying of disks into the Solid State Disk and operating software for Standard DC 147K — Single Drive 294K — Dual Drive

PASCAL SPEED-UP SYSTEM

Unleash the powerful 6809 processor advantage of the 6809 ease-of-use, speed! The 'Pascal Speed-up System' consists of Stellation-Two, Pascal Speed-up kit, software packages, and instructions.

AUTO-DOC by Prometheus

Unique Apple II compatible disk controller, and others. Performs (Mother ROM card, RAM card) diagnostics of critical automatically! Provides descriptive error indicating which IC is bad. More extensive disk drives, peripheral cards, etc are provided that all major areas of your Apple II are v diagnostic controller card, disk of additional

A.P.P.L.E. DISK

DISKPAK 12A

Graphic and educational games that i pack. We recommend it for anyone playing owner family members. (Integer and A please specify when ordering.)

DISKPAK 34A

Continuation of the above diskpak demonstrations and games. Includes a programs.

DISKPAK 5

Home economics is the theme of this. Contains neat games and demonstration programs, an electronic recipe file, and n "what can you do with it?" lately, this r

DISKPAK 6B-16

Great utility package that allows you t for bad sectors, reconstruct blown cata data, more... and all with a single dri away with the Apple DOS manual and th for those occasional emergencies.

DISKPAK 7

Two separate diskettes chock full of simulations for the 'child' in all of us. Incl ever popular TRIK 1.0 CONTRACT BRID (Requires Integer in ROM or a RAM card)

DISKPAK 8

More educational games, puzzles, and, and your Apple.

A.P.P.L.E. LI

APPLE II USER'S GUIDE

Contains all the information you'll need Apple microcomputer. Learn to program Basics using color, graphics, and sound. (disk drives, printers, advanced programming Newly revised edition is highly recomm users.

BENEATH APPLE DOS

Perfect companion to DISKPAK 6B-16 Comprehensive, spiral-bound book con leaves off and details all versions of the A how it can be modified to suit your programmer!

CALL —A.P.P.L.E. IN-DEPTH

IN-DEPTH DISK, VOL 1

\$16.50

Collection of programs present within the pages of "All about Applesoft" described above.

→ Vol 2, "ALL ABOUT PASCAL"

\$11.00

Wide range of new and useful articles and programs specializing in the Apple Pascal language. Feature articles contain switching to and from BASIC from the Pascal Environment, supplemental information for beginners, a P-code decoder, graphics editor, in-depth reviews, text formatter, up-to-date bibliography, and more! Almost everything you wanted to know about Pascal but didn't know where to look.

IN-DEPTH DISK, VOL 2

\$20.00

Two disk set of programs contained within the pages of "All About Pascal", described above.

CALL —A.P.P.L.E. BACK ISSUES

1982 Back Issues (Jan thru present) \$2.50 each

1981 (Jan, M/A, Jun, J/A, Sep, Oct, N/D) \$2.50 ea (qty limited)

1980 (M/A, May, Jun, N/D) \$2.00 each (qty limited)

BOUND SET FOR 1981

\$18.50

Complete set of Call —A.P.P.L.E. issues for the 1981 calendar year, all binder punched and indexed for easy reference. Perfect gift when combined with the Anthology 5, 6, & Pascal81 disks (see below).

INSIDE WASHINGTON APPLE PI

\$7.00

Collection of programs, articles, and useful Apple-related information from the newsletters of the Washington Apple Pi.

PEEKING AT CALL —A.P.P.L.E.

\$7.50

Vol 1, 1978 Compendium

\$10.00

Vol 2, 1979 Compendium

\$15.00

Vol 3, 1980 Compendium

This annual publication collects all the articles of Call —A.P.P.L.E. magazine for a given year in one volume. Especially recommended for anyone about to become an Apple owner and/or future member of A.P.P.L.E. A great gift idea when combined with the Anthology Volumes for the corresponding year!

ANTHOLOGY VOLUMES

\$12.50

Contains all programs found between the pages of Call —A.P.P.L.E. magazine for six month period (see chart below). A great way to obtain terrific programs and utilities without the worry and bother of typing them in correctly. Consult back issues or the PEEKING Compendiums for individual program documentation as these disks are not standalones.

THE POWER OF VISICALC

Clearly-written and illustrative exercise manual designed to increase your comprehension and use of the VisiCalc program and its powerful functions. Picks up where the VisiCalc manuals leave off with actual, working examples that are easily installed to your own programs. (Please specify volume number)

Volume 1

\$8.50

— covers movement of blocks, values to/from reference tables, maximum/minimum values, changing worksheet sequences, nested lookup tables, file storage, conversion of math to VisiCalc, and more.

→ Volume 2

\$8.50

— covers Accounts Payable, Payroll reports, Monthly Sales and Daily Inventory reports, and Financial Forecasting.

USING 6502 ASSEMBLY LANGUAGE

\$17.00

This simple and easy-to-understand book "was written with the beginner in mind" and covers not only the theory behind 6502 (Apple) machine language, but the practical aspects and how they apply to you and your Apple. Contains complete Sweet 16 tutorial, many illustrations, examples, and exercises to advance you from a 'beginner' to an 'intermediate' assembly language programmer.

ASSEMBLY LINES: THE BOOK

\$17.00

"I will guarantee that by page one-hundred you may even surprise yourself as to how easy machine language programming really is." Written by Roger Wagner, author of a monthly column in Softalk magazine, this book approaches Apple 6502 machine language programming from a different angle and rewards the reader with short, simple, and achievable lessons that builds upon his/her knowledge of BASIC. (A perfect companion to A.P.P.L.E.'s own BIG MAC or BIG MAC.LC editor/assembler.

WHAT'S WHERE IN THE APPLE

\$12.50

Atlas and gazetteer of the Apple II memory for the BASIC programmer. Each entry describes a single memory location, given in decimal and hex, and (if applicable) the name of the symbolic label, followed by a brief explanation of the routine which resides there. A definite must for those wanting a PEEK's and POKE's dictionary and with an insatiable appetite for more Apple information.

WOZTALKS

\$27.50

Video tape of Steve Wozniak of Apple Computer fame during October '81 meeting. Charming ramble through the cofounder's personal background, history of Apple Computer, the people who helped to shape it, and more! Tape is approximately 90 minutes in length and VHS format only.

PUBLIC DOMAIN SOFTWARE

\$4.00 each disk volume

Variety of programs at a low-cost of \$.15 to \$.25 per program! Disks contain anything from graphic demos/games to disk and printer utilities, tutorials, business and inventory programs to Pascal and . . . you name it. Complete listing of over 100 diskettes available by sending a 37-cent SASE to the Order Dept. (Note: PDS diskettes are 13-sector format)

A.P.P.L.E. SERVICES AND ACCESSORIES

THE SOURCE

\$75.00

Join the computer telecommunications revolution and get on-line to America's Information Utility. The Source offers a wide range of online databases, electronic mail, shopping services, 'chatting' with other members, and numerous other features. In addition, A.P.P.L.E. is offering an online version of Call —APPLE for use by its members. The 'closed system' will be available exclusively to our members and will feature special offers on products and new releases, ability to download programs as they appear in the magazine, a technical HOTline, and more! Plus all the advantages of the Source's largest area user network at your fingertips.

REDUCED RATE SUBSCRIPTIONS

Simply fill out enclosed subscription coupon and mail to appropriate magazine publisher for reduced rate subscriptions courtesy of A.P.P.L.E.

— **PEELINGS** — Special savings of \$3.00 over the regular subscription rate. Peelings is well known for their up-front product reviews and information of the ever-expanding Apple computer software and hardware market.

— **SOFTALK MAGAZINE** — Special subscription rate for A.P.P.L.E. members of \$15.00, a savings of \$6.00 over Softalk's regular subscription price. Superb and up-to-date information on the indepth goings-on of Apple-related hardware and software companies, new product releases, and how it all applies to you!

JEWELRY

\$3.00

Exclusive offer from A.P.P.L.E. Show your pride and support in being a member of the World's Largest Apple user Group by sporting one of these cheery baked-enamel lapel pins. Eye-catching red and gold trim with Call —A.P.P.L.E. [apple & telephone] logo is a must for the discerning A.P.P.L.E. member.

DISK BANKS

(2/9.00) \$5.00

Store and protect your valuable diskettes in this unique and versatile disk filing system. Each case holds up to 10 diskettes and features an adjustable slide-out drawer, convenient interlocking grooves on sides/top allow for stacking/expansion, and sturdy, safe storage of your magnetic media.

BLANK DISKETTES

Quality diskettes are 5-1/4" certified single-sided, double-density with durable mylar hub ring for use with all Apple computer disk systems including AP.DRIVE. Includes jackets & write protects.

Verbatim Data-Life

(\$2.35/20 or more) ea \$2.47

Control Data Corporation

(\$2.00/90 or more) ea \$2.20

PRODUCT REPLACEMENT POLICY

Products are guaranteed to work as described in the documentation. If you receive an A.P.P.L.E. product that is defective, return it (with a copy of your sales receipt) to the Order Dept. within 30 days of purchase for a replacement or full credit to your account. Thereafter, payment of \$5.00 must accompany original disk and proof of purchase. Note: Documentation and program disks are sold only as a complete package and are not available separately.

SALES TO MEMBERS ONLY

Prices are subject to change without notice and specials are not included in this listing.

PRODUCT	UNIT PRICE	*FOREIGN SHIPPING CHARGES (See below)	AMOUNT

FOREIGN & CANADIAN SHIPPING/HANDLING CHARGES CHART

In an attempt to simplify things for our members outside the United States, we have devised this easy rate chart for figuring the shipping and handling charges on your order. Simply determine the TOTAL amount of your order and add the correct amount as corresponds to the rate chart. (NOTE: THIS DOES NOT APPLY TO APPLICATIONS OR RENEWALS — BUT TO PRODUCT ORDERS ONLY!)

total amount of order	shipping/handling
\$ 0.00 — \$ 20.00	add \$ 6.00 to order
\$ 20.01 — \$ 60.00	add \$12.00 to order
\$ 60.01 — \$100.00	add \$18.00 to order
\$100.01 — \$140.00	add \$24.00 to order
\$140.01 — \$175.00	add \$30.00 to order
\$175.01 — and over	add \$36.00 to order

Note to Foreign Members: All hardware products, except AP.LCASE lower case adapters, must include a United States address. These products cannot be shipped outside U.S.
